Academic Profile

Motivated Computer Science graduate with strong academic standing and hands-on experience in software development and educational technologies. Achieved consistent merit-based recognition, including a Bronze Medal and a merit-based laptop award. Completed a research-oriented Final Year Project focused on adaptive learning systems. Seeking admission to a Master's program in **Software Science and Technology** in France, with a strong interest in software systems, scalable applications, and applied computing.

Education

Bachelor of Science in Computer Science (BSCS)

COMSATS University Islamabad, Vehari Campus

CGPA: **3.56 / 4.00**

Graduation Year: **2025**

Academic Achievements & Honors

- **Bronze Medalist**, BS Computer Science — COMSATS University Islamabad
 - **Merit-Based Laptop Award**, awarded in **6th Semester** for academic excellence
-

Final Year Project

Intelligent Tutoring System (ITS) — BSCS Final Year Project

- Designed and developed an **adaptive e-learning platform** to personalize educational content based on learner performance.
 - Implemented user performance tracking and rule-based recommendation logic to support personalized learning paths.
 - Developed backend logic using **Python** and **SQLite**; created responsive user interfaces using **HTML** and **CSS**.
 - Focused on modular software design, data handling, and usability for educational applications.
-

Academic & Technical Projects

Alphabet Learning Mobile Application (Flutter)

- Designed and developed a mobile learning application to assist early-age learners with alphabet recognition. - Implemented clean UI/UX principles using **Flutter and Dart**. - Emphasized usability, responsiveness, and educational interaction design.

Dynamic Table Generator Application

- Developed a utility-based application to dynamically generate tables based on user-defined inputs. - Implemented customization features for rows, columns, and data formatting. - Applied modular programming and structured logic for input handling and output generation.

Technical Skills

Programming Languages: Python, C++

Web Technologies: HTML, CSS

Mobile Development: Flutter, Dart

Databases: SQLite

Development Tools: Visual Studio Code, GitHub

Academic & Professional Skills

- Software design and modular programming
 - Problem analysis and logical reasoning
 - Team collaboration and academic communication
 - Self-directed learning and adaptability
-
